# Digital Health for People-Centred Care

## eRegisters is Digitising Primary Health Care

A national, DHIS2-based digital solution that supports health workers to deliver better, safer and more continuous care from the facility to the national level.

## What eRegisters Delivers

- Digital client registers for key services
- Appointments and follow-up (e.g. ANC, PNC, Immunisation)
- Same-visit services (e.g. HIV, TB, NCDs, Nutrition)
- Real-time dashboards and reports
- Online and offline use (web and Android)

## Benefits

### For Health Workers

- ✓ Simpler, faster and more accurate service delivery
- ✓ Complete client history in one place
- ✓ Easier reporting and data use for action

### For Patients & Communities

- ✓ More coordinated and continuous care
- ✓ Timely reminders for appointments and follow-up
- ✓ Improved access to essential health services closer to home

**Uganda eRegisters**

*People | Services | Data for Better Health*

International CPHIA
Conference on Public Health in Africa

23–27 November 2026
Addis Ababa, Ethiopia

## Implementation at a Glance (Uganda)

**Over 4,500** facilities using eRegisters

**Over 30k** registered users

**Over 11 Million** registered clients

## Key Lessons for National Rollout

- Start with priority registers and scale iteratively.
- Invest in hands-on capacity building and continuous support.
- Ensure offline functionality for reliable use at all facility levels.
- Use data for timely action and to improve service quality.

## Opportunities for Collaboration

- Scale and sustain eRegisters across Uganda and the region.
- Strengthen interoperability (e.g. eCHIS, EMRs, eIDSR, NDWH, LIMS)
- Co-develop innovations for PHC, surveillance and resilient health systems.
